Crown Splitting Pliers

No. 18593

*Thickness / 0.9mm
*Width / 7mm

*Designed for quick and comfortable removal of crown. Also able to remove crown on mobile tooth.

How to Use
1. 1.2mm to 1.5mm slit is put into a crown with a bur. (For Molars: Put a slit on mesial angle area of buccal side to the middle of occlusal surface.)
2. Apply the tip of the instrument at a slit and handle is grabbed, a tip will open right and left and a crown will separate.

Removing Driver

No. 21073

*Remove prosthesis by leverage.
*Surface preparation has been performed at the tip for the skid.

Temporary Crown Removing Pliers

No. 21077

*Cvd.
No. 21074

*Str.
No. 21073

*Thickness / 0.4mm
*A tip opens right and left.
**Automatic Crown Remover Set**

*The instrument is held with one hand and the other hand is used to secure the instrument at the margin of the crown to be removed.*

*Able to adjust impulse strength.*

Crown Removing Pliers Professional for U.A.

**Contents**
- Main body / for U.A. Tip (10 ea.)

*You can remove a try-in crown on upper anterior teeth, without leaving a scar or damage on them.

*It is effective for removing ceramic crowns, hybrid-ceramic crowns, and others, to which need to pay special attention in order not to break or make a scar.

No. 21080

*This flexible tip fits with a variety of tooth surface and it makes holding stable.

*Hold the cervical contour of the crown. The tip of the hall wraps the cervical contour, and holds it stable. Hole of tip part holds the height part softly and the silicon tip grips surface stably. PAT.P

*Please do not hold margin part of crown. Holding thin parts such as the margins of crown, especially ceramic or resin one, may occur breakage. Do not apply excessive force because it might happen breakage or scars on the crown, and other risks. So apply moderate force, and treat it slowly.

*Material (Pink tip) / Si

---

Crown Removing Pliers Professional

**Contents**
- Main body / Tip (10 ea.)

*You can remove a try-in crown on upper anterior teeth, without leaving a scar or damage on them.

*It is effective for removing ceramic crowns, hybrid-ceramic crowns, and others, to which need to pay special attention in order not to break or make a scar.

No. 21079

*This flexible tip fits with a variety of tooth surface and it makes holding stable.

*Grooving is applied in opposite direction of operation to avoid slip.

*This product holds the height part softly. Hole of tip part holds the height part softly and the silicon tip grips surface stably. PAT.6299023

*Please do not hold margin part of crown. Holding thin parts such as the margins of crown, especially ceramic or resin one, may occur breakage. Do not apply excessive force because it might happen breakage or scars on the crown, and other risks. So apply moderate force, and treat it slowly.

*Material (Blue tip) / Si

---

Individual Parts

**for U.A. Tip No. 90459 (10 ea.)**

*This product holds the height part softly. Hole of tip part holds the height part softly and the silicon tip grips surface stably. PAT.6299023

*Tips are designed to be parallel when it holds crown. *This great feature enables Dr.’s to hold crown with stability.

Size / 160mm

---

Individual Parts
Crown Gripper T/C

*Suitable for removing temporary crown or applying try-in crown.

No. 21083

*This T/C applied tip makes stable hold.

Size / 165mm

*This scissors type pliers is easy to open and close with less stress.

*This narrow handle makes it possible to feel the tip during operation as the handle is moderately flexible. It decreases the risk of breakage of crown.

*Unlike hook type one, this gripper is easy to approach molar teeth and hold them with stability.
